

## Subject Index

- ABO-blood group abnormality 161  
N-acetyl-beta-glucosaminidase of peripheral blood lymphocytes 209  
acid phosphatase 67  
acid phosphatase and beta-glucuronidase, cytochemistry 68  
acquired B-antigen 161  
acute leukemia 67, 89, 356  
acute undifferentiated leukemia 227  
acute mixed lymphoblastic-myelomonoblastic leukemia 11  
aging 209  
alpha naphthyl acetate esterase 101  
altered T-cells distribution in CLL 265  
alternating current spectroscopy 185  
anemia, hereditary megaloblastoid hemolytic 23  
anemia, idiopathic refractory sideroachrestic 11  
anti-B-chronic lymphocytic leukemia serum 249  
anti-idiotype antibodies 111  
antisera 249  
aplastic anemia 1  
autoimmune hemolytic anemia 321  
autoimmune hemolytic anemia with reticulocytopenia 326  
autologous bone marrow transplantation 89, 357
- B-cell leukemias 95  
beta-glucuronidase 67  
BFU-E 171, 321, 324  
blood 185  
blood group-serological status 162  
blood smear 17  
blood transfusions 61  
B-lymphocyte antigen (P 76) 249  
bone marrow aspirate 16, 17  
bone marrow aspiration 323  
bone marrow cell culture 340  
bone marrow cultures 321  
bone marrow, electron microscopy 28  
bone marrow, iron stain 16  
bone marrow, light microscopy 28  
bone marrow transplantation 125, 355  
bone marrow transplantation from unrelated histocompatible donors 357  
burst promoting activity 171
- cell culture 143  
cell-marker studies in CLL 261
- cell surface markers 313  
CFU-C 91, 231, 324  
CFU-C colonies, long-term culture of -- in agar 231  
CFU-E 171, 325  
CFU-GEMM 324  
CFU-S 2, 3  
chronic lymphocytic leukemia 165, 249, 261  
clotting factors, influence on the growth of tumor cells and leukemic cells 85  
coagulant activity of factor VII 51  
cold agglutinins 111  
colon-carcinoma detection by an ABO-blood group abnormality 161  
colony forming cells (CFC) 1  
colony forming units 339  
colorectal carcinoma 161  
common-ALL-antigen 199  
conductivity 185  
congenital dyserythropoietic anemia 329  
congenital nonspherocytic hemolytic anemia 271  
contribution of oxyhemoglobin to the iron-induced hemolysis 217  
crossreaction of monoclonal anti-C-cell antibodies 95  
cyclophosphamide-induced immune thrombocytopenia 165  
cytoplasmic organelles 312
- delta-dispersion 191  
dextran sulfate 39  
dielectric constant 185  
dyserythropoiesis 23  
dyserythropoietic anemia type I 329  
dyserythropoietic features in the bone marrow (P. falciparum malaria) 283
- EBMT aplastic anemia working party 356  
EBMT leukemia working party 355  
ecto-5'-nucleotidase 199  
electrical properties of blood and its constituents 185  
electron spin resonance 23  
electrophoretic mobility 25  
enhancement of GM-CSF in feeder layers 340  
enzyme deficiency 271  
erythroblast 329  
erythroblast / evagination of the nuclear envelope 335

- erythroblastophagocytosis (*P. falciparum* malaria) 284  
 erythrocytes 289  
 erythrocyte membrane abnormalities, differential diagnosis 34  
 erythroid cell differentiation 171  
 extramedullary hemopoiesis, stimulation by dextran sulfate 39
- factor VII Ag 47  
 factor VII C 47  
 factor VII defect 47  
 factor X defect 149  
 factor XIII 85  
 factor XIII and fibronectin 175  
 Fc-gamma receptors 311  
 Fc-receptor 297  
 fetal growth 209  
 fibronectin 85  
 fibronectin, factor XIII 175  
 filtrability 23  
 fluorescent antibody technique 73  
 freeze fracture 329
- gamma-dispersion 191  
 glucosephosphate-isomerase type Kaiserslautern 271  
 graft-versus-host-disease 356  
 graft versus-host disease following blood transfusions 61  
 graft versus host disease following bone marrow transplantation 125  
 granulocytes 101  
 granulocyte/macrophage progenitor cells, determination of— 81  
 granulocyte-monocyte colony forming cells 339
- hairy cell leukemia 249  
 hand-mirror forms in AUL: cytochemistry and ultrastructure 227  
 hematological malignancies 134  
 hemoglobin 185, 217  
 hemolysis 217  
 hemolytic anemia 271  
 hemopoiesis 39  
 hemopoietic precursor cell regeneration 1  
 hemopoietic reconstruction after ABMT 91  
 homopoietic regeneration 1  
 hereditary megaloblastoid hemolytic anemia 23  
 heterozygous factor X Friuli defect 149  
 high-dose intravenous immunoglobulin 347  
 Hodgkin's disease 165, 173  
 human hematological malignancies 133  
 human lymph nodes 134  
 4-hydroperoxycyclophosphamide 89  
 hypoproconvertinemia 47
- idiopathic refractory sideroachrestic anemia (IRSA) 11  
 idiopathic thrombocytic purpura in pregnancy 347  
 immune thrombocytopenia purpura 165  
 immunoblastic lymphoma, bone marrow histology 82  
 immunoblastic lymphoma 81  
 immunocytoma, IGM secreting 81  
 immunodeficiencies 239  
 immunofluorescence 134  
 immunoglobulin expression 107  
 immunohematological disorders 1  
 immunological aspects of childhood idiopathic thrombocytopenic purpura 117  
 immunoperoxidase 77  
 ineffective erythropoiesis 279  
 inhibiting immun complex binding to platelets 122  
 in situ hybridization 107  
 intracellular LDH level and isoenzyme distribution of CLL cells 265  
 intravenous gamma globulin 165  
 intravenous IgG in childhood ITP 120  
 intravenous immunoglobulin 347  
 intravenous immunoglobulin treatment in childhood ITP 117  
 iron-induced hemolysis 217  
 iron toxicity 217  
 irradiation and syngeneic marrow transplantation 1
- lactic dehydrogenase isoenzyme analysis 261  
 large granular lymphocytes 297  
 leucocytes 339  
 leukemia 1  
 leukemia, acute 89  
 leukemia, acute mixed lymphoblastic-myelomonoblastic 11  
 leukemia, acute undifferentiated 227  
 leukemia markers 95  
 leukemias 137  
 leukemic cells 133, 199  
 leukemic cell proliferation 85  
 light microscopy 331  
 lipid peroxidation 217  
 long-term culture of CFU-C colonies in agar 231  
 low frequency properties 193  
 lymph nodes, bone marrows and peripheral blood 134  
 lymphocytes 101, 209

- lymphocytes with parallel tubular structures 311  
lymphocyte subpopulations 311  
lymphocytic non-Hodgkin's malignant lymphoma 135  
lymphocytic leukemia 67  
lymphokines 155  
lymphoma-associated cold agglutinins 111  
lymphoma, high grade malignant 81  
lymphoma, immunoblastic 81  
lymphomas 111  
lysosomes 209
- malaria 279  
malignant lymphomas 1  
malignant lymphoma of immunoblastic type 81  
malignant tumor nuclear antigen 133  
malondialdehyde 218  
mast cell-like cells from human pleural exudate cells 143  
mast cell origin 143  
Maxwell-Wagner effect 188  
maturation 209  
mechanisms of erythroid cell differentiation 171  
membrane fluidity 289  
membrane marker 261  
messenger RNA 107  
methylprednisolone 125  
migration inhibition 155  
mismatched bone marrow transplantation in acute leukemia 356  
mismatched bone marrow transplantation in SCID 357  
monoclonal antibodies 95  
monoclonal OKT antisera 261  
monocytes 101  
morphology of B cells 317  
morphology of EA-RFC 317  
morphology of Null cells 315  
morphology of T cells 313  
multiple myeloma-plasma cell 73  
myeloma cells, immunofluorescent studies 73  
myeloma cell, ultrastructure 76
- natural cytotoxicity 297  
natural killing 297  
natural killer cells 239  
NBT-reduction 155  
NK cells, the origin of human - 239  
non-Hodgkin lymphomas 165, 173  
nonsecretory myeloma, heavy chain loss after treatment with melphalan 73  
normal erythroblast / convexity and concavity of nuclear envelope 336  
nuclear pore 329  
nucleoli 133
- OKT markers on CLL cells 264  
osmotic fragility 25, 289  
ovarian carcinoma 165  
oxyhemoglobin 217
- parallel tubular structures 311  
peripheral blood feeder layers 339  
peroxidation 217  
plasmamembrane subfractions 199  
plasmodium falciparum malaria 279  
platelets 101  
platelet phagocytosis 122  
polyacrylamide gel electrophoresis 25  
polymorphonuclear leukocytes-stimulation 155  
preleukemia 11  
preparation of conditioned medium 340  
progenitor cell level 5  
proliferating cell nuclear antigen 133  
proliferation kinetics 279  
properties of erythrocyte ghosts 187  
pseudo B-antigen 161
- quantitative autoradiography 279
- reactivity of monoclonal antibodies against cold agglutinins 113  
red cells 101  
red cell membrane abnormalities 23  
regeneration of the progenitor cell compartment 5  
regeneration of the stem cell compartment 3  
reticulocytopenia 321  
Russell's viper venom 150
- scanning electron microscopy 23  
SDS-polyacrylamide gel electrophoresis 254  
severe combined immune deficiency (SCID) 239  
shed membranes 201  
simultaneous effect of iron and hemoglobin on lipid peroxidation 217  
spleen 39  
splenic hemopoiesis after repeated leukapheresis 42  
splenic hemopoiesis, evaluation of - 41  
splenic hemopoiesis in controls 41

spontaneous shedding 203  
stem-cells (a poem) 183  
stypven-cephalin clotting time 149  
superoxide radical 217  
  
thin section electron microscopy 331  
thrombin 85  
thromboplastin 47

transplantation of hemopoietic cells 1  
treatment of idiopathic thrombocytic purpura in pregnancy 347  
trends and tendencies in european bone marrow transplantation 358  
tumor cell proliferation 85  
  
zymosan 155
